## AGENDA SUPPLEMENT (8) – APPENDIX D/PART 8

Dear Sir/Madam

### LOCAL PLAN WORKING GROUP - TUESDAY 29 OCTOBER 2013

I refer to the agenda for the above-mentioned meeting and enclose the following item:

Item No	Report Title	Page Nos
8.	Attleborough Link Road Study – Appendix D/Part 8  Report by Phil Mileham, Deputy Planning Manager.  Unfortunately, due to the size of Appendix D, I have had to split the document into 9 parts – this is part 8 of 9.  NB: There will be a limited number of hard copies available on the day.	641 - 703

Yours faithfully

*Julie Britton*

Senior Committee Officer

Appendix B1

### Site Details

Site at, Attleborough, Norfolk

The historical maps shown were reproduced from maps predominantly held at the National Archives in England, Wales and Scotland in the 1840's. In 1854 the Ordnance Survey produced a series of maps for the county of Norfolk at a scale of 1:25,000 and these were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent inaccuracies in outlying county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

## Ordnance Survey Plan Published 1958 - 1959

### Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey (OS) Archives in Southampton in the 1840s. In 1854 the OS produced a series of maps for the counties of England and Scotland at the 1:50,000 scale for use as a reference for the OS's 1:25,000 scale maps. The OS then used these maps to update the 1:10,560 maps. The published data given therefore are often some years later than the surveyed data. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

# 10k Raster Mapping Published 2006

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 scale raster maps from 2006. These maps are derived from the 1:10,000 scale maps published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

# Large-Scale National Grid Data Published 1995

## Source map scale - 1:2,500

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Small Scale National Grid Data' in 1992, and digital data produced in 1999). This information is derived from aerial photography and provides detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, England, Wales and Scotland in the 1840s. The 1:2,500 scale maps were reproduced for the first time by 1883. It covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1933 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

### Historical Mapping Legends

#### Large-Scale National Grid Data 1:2,500 and 1:1,250

This legend defines symbols for various geographical features and infrastructure. It includes symbols for slopes, cliffs, rock, boulders, and various types of trees (coniferous and non-coniferous). It also covers man-made structures like buildings, roofs, and transmission lines, as well as utility markers like pylons and poles. A grid system is shown with letters A1 to A18 and numbers 1 to 18.

#### Ordnance Survey Plan, Additional SIMs and Supply of Unpublished Survey Information 1:2,500 and 1:1,250

This legend defines symbols for a wide range of features including quarries, pits, rock, boulders, and various types of buildings (roofed, sloping masonry, archway). It also includes symbols for trees, vegetation like reeds and heath, and utility features like benches, triangulation stations, and pylons. It also covers boundaries like county and parish boundaries, and various types of roads and railways.

#### Ordnance Survey County Series and Ordnance Survey Plan 1:2,500

This legend defines symbols for natural and man-made features such as sand pits, refuse heaps, flat rocks, marshes, rough pastures, and various types of wood (mixed, brushwood, fir). It also includes symbols for water features like fords, waterfalls, and rivers/canals, as well as infrastructure like railways, roads, and embankments. It also covers various types of boundaries and utility features like poles and call boxes.

## Historical Mapping Legends

### Large-Scale National Grid Data 1:2,500 and 1:1,250

This legend defines symbols for various geographical features and infrastructure. It includes symbols for slopes, cliffs, rock, boulders, trees, orchards, coppices, rough grassland, directions of water flow, triangulation stations, electricity pylons, buildings, and various types of boundaries (civil parish, county, etc.). A list of abbreviations (Bks, Bly, Cem, etc.) is provided for reference.

### Ordnance Survey Plan, Additional SIMs and Supply of Unpublished Survey Information 1:2,500 and 1:1,250

This legend defines symbols for features like inactive quarries, rock, boulders, roofs, archways, trees, orchards, coppices, rough grassland, directions of water flow, cave entrances, and various boundaries. It also includes a list of abbreviations (BH, BP, BS, Cn, C, etc.) for specific features.

### Ordnance Survey County Series and Ordnance Survey Plan 1:2,500

This legend defines symbols for a wide range of features including sand pits, refuse heaps, flat rocks, marshes, rough pasture, mixed wood, fir, fery, trig stations, bench marks, surface levels, antiquities, cutting, embankment, road crossings, railways, rivers, canals, and various boundaries. A comprehensive list of abbreviations (B.P.B.S., B.R., E.P., etc.) is included.

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Simulation on Map' in 1992, and digital data produced until 1999). The information on these maps is derived from aerial photography and provides detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

### Historical Mapping Legends

#### Large-Scale National Grid Data 1:2,500 and 1:1,250

This legend defines symbols for various geographical features and infrastructure. It includes symbols for slopes, cliffs, rock, boulders, trees, and buildings. It also lists symbols for direction of water flow, triangulation stations, and electricity pylons. A list of abbreviations (Bks, Bly, Cem, etc.) is provided for reference.

#### Ordnance Survey Plan, Additional SIMs and Supply of Unpublished Survey Information 1:2,500 and 1:1,250

This legend defines symbols for features like inactive quarries, rock, roofed buildings, and various types of trees. It includes symbols for directions of water flow, cave entrances, and electricity pylons. A list of abbreviations (BH, BP, BS, etc.) is provided for reference.

#### Ordnance Survey County Series and Ordnance Survey Plan 1:2,500

This legend defines symbols for features like sand pits, gravel pits, shingle, sloping masonry, marsh, rough pasture, mixed wood, fir, and various types of roads and railways. It includes symbols for level crossings, road crossings, and various types of boundaries. A list of abbreviations (B.P.B.S., B.R., etc.) is provided for reference.

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, England, Wales and Scotland in the 1840-1854 period. The maps were scanned at a scale of 1:2,500 and then reprojected to the 1933 datum. The published date given below is often some years later than the surveyed date. Before 1933 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, England, Wales and Scotland in the 1840-1854 period. The 1:2,500 scale maps were produced for the Ordnance Survey by 1854 and covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1933 all OS maps were based on the Cassini Projection with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a 'work-in-progress' than published maps and they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.
