<b>Landowner/Site promoter comment:</b>	
<p><b>Bidwells on behalf of Abel Homes</b> Abel Homes are promoting land north of Foxley Road, Bawdeswell for residential development (LPR/CS4/DEV/161). The Site Profile assessment undertaken by the Council in relation to the site concludes that:</p> <p>The site is within Bawdeswell a Local Service Centre and is Greenfield Adjacent to the existing built-up area.</p> <p>All scenarios in the Development Scenarios consultation align with the site. Accordingly, the site will be considered by the Council as part of their Phase 2 Assessment; a position supported by Abel Homes. However, in undertaking the high level assessment of the site, it is evident that certain incorrect assumptions have been made by the Council. To ensure that the Phase 2 Assessment is robust and based on correct information these matters are addressed below</p>

<p><b>Bidwells on behalf of Breckland Bridge</b> Breckland Bridge are promoting land north of Herne Lane, Beeston for residential development (LPR/CS4/DEV/168). The Site Profile assessment undertaken by the Council in relation to the site concludes that:</p> <p>The site is within Beeston a Local Service Centre and is Greenfield Adjacent to the existing built-up area.</p> <p>Scenarios A, B, D, E and F in the Development Scenarios consultation align with the site.</p> <p>Accordingly, the site will be considered by the Council as part of their Phase 2 Assessment; a position supported by Breckland Bridge.</p> <p>As detailed elsewhere in this representation, Breckland Bridge support, in principle, the proposed methodology to be adopted by the Council when undertaking the Phase 2 Assessments, including the identification of matters at paragraph 5.3, against which sites will be considered</p>

<b>Landowner/Site promoter comment:</b>	
<b>Brown and Co</b> land off Back Lane, North Elmham (site reference LPRC4SDEV330 In response to the Phase 1 Assessment, the following points are noted: - The existing footway on Back Lane adjoins the south-western corner of the site and so significant improvements to pedestrian facilities would not be required.; - It is also noted that there is potential for a new pedestrian link to Eastgate Street (as noted in the original call-for-sites submission).; - The site would lend itself to a phased or reduced scale development if necessary to address concerns about the size of the proposal.; - The proposed site does adjoin the current settlement boundary.

<b>Dereham Town Council</b> Site not assessed at Phase 1 stage.	
<b>Landowner/Site promoter comment:</b>	
<b>Bidwells on behalf of Abel Homes</b> Abel Homes are promoting land south of Swanton Road, Dereham, for residential development (LPR/C4S/DEV/344). Based on the information available, we cannot see that a Site Profile Assessment has been undertaken for the site. Given the close proximity of the site to land being promoted to land north of Swanton Road, Dereham (LPR/C4S/DEV/166), it is assumed that the site will be assessed in a similar manner. On this basis, it is assumed that the site will be considered by the Council as part of their Phase 2 Assessment; a position supported by Abel Homes.

<b>Landowner/Site promoter comment:</b>	
<p><b>Bidwells on behalf of Breckland Bridge</b> Breckland Bridge are promoting land at Back Street, Garboldisham for residential development (LPR/CS4/DEV/169). The Site Profile assessment undertaken by the Council in relation to the site concludes that:</p> <p>The site is within Garboldisham a Local Service Centre and is Greenfield Adjacent to the existing built-up area.</p> <p>Scenarios A, B, D, E and F in the Development Scenarios consultation align with the site.</p> <p>Accordingly, the site will be considered by the Council as part of their Phase 2 Assessment; a position supported by Breckland Bridge. However, in undertaking the high level assessment of the site, it is evident that certain incorrect assumptions have been made by the Council. To ensure that the Phase 2 Assessment is robust and based on correct information, these matters are addressed below.</p>

**Landowner/Site promoter comment:**

**Ceres Property on behalf of Barratt David Wilson Homes (Anglia)** Whilst the methodology and proposed criteria for site assessments is broadly acceptable it is fundamentally flawed with regards to site location and relationship to settlements and the parish it falls within. Despite a site adjoining an existing market town, where it falls in a neighbouring village parish administrative boundary, it has been assessed under the cluster of sites submitted to and related to that particular village, rather than the market town it adjoins. Paynes Meadow –LPR/CS4/DEV/348’ in the Phase 1 Site Assessment (February 2024). The Site clearly relates to and adjoins the settlement boundary of Watton, however as the Site technically falls within the Griston parish boundary it has been assessed against Griston as a ‘Village with boundaries’ in the site assessment. Consequently it’s alignment with the proposed alternative development scenarios (A-F) is misrepresented, aligning with Scenarios E and F. The Site should be assessed as a Watton site irrespective of what parish it falls within. It very clearly does not relate to the village of Griston by any measure or metric and should be assessed as an extension to the market town of Watton.

<b>Landowner/Site promoter comment:</b>	
<b>Turley on behalf of Silverley Properties Ltd</b> The Site is located on a greenfield site adjacent to the settlement boundary of Harling on both the northern and eastern boundaries. The Council's Site Profile Assessment (December 2023) of the Site (Ref: LPR/C45/DEV/133) provided a red rating on this matter.  2.6 However, given the limited opportunity for brownfield sites within East Harling, all of the sites being proposed for development within Harling are on greenfield sites. As such, this should not be a constraint to development within this Local Service Centre. (Further site analysis details provided)

<b>Historic England</b> No site specific comment. HIA to inform Plan required, prepared in accordance with Historic England guidance.	
<b>Landowner/Site promoter comment:</b>	
<p><b>Gladman</b> Land at Lopham Road has been assessed in line with this new criteria. As per the previous paragraph, the site has scored red for pedestrian access, yet the previous planning application (3PL/2018/1557/O) referenced within the assessment stipulates that improved pedestrian access and connectivity can be delivered. It would be preferable that the site assessment temper the scoring to reflect this, rather than potentially discredit a highly suitable and sustainable site based on a highly simplified traffic light system.</p> <p>As shown below, with the improved pedestrian access provided by the access points on Lopham Road, two safe walking routes are available to the school and shop. The yellow route has footpaths that can be safely used by pedestrians, pushchairs and children, and the maroon route utilises a connecting footpath between the Crescent and Jubilee Avenue. With these routes considered, Gladman consider that Lopham Road should be scored amber or green Notwithstanding this, Gladman agree that Land at Lopham Road is a suitable extension to a Local Service Centre and is compatible with development strategy options A, B, D, E and F. The site is available and achievable and can make a valuable contribution to the housing requirements of Harling and the wider Breckland district. Regular public transport is available for residents, providing sustainable connections to larger neighbouring towns and a wide range of employment, leisure and retail opportunities. (Further detailed site commentary provided)</p>

<p><b>Norfolk Local Lead Flood Authority advice</b> Not reviewed</p> <p><b>Water Management Alliance advice</b> Major Development within the watershed catchment of NRIDB, adjacent to an ordinary watercourse.</p> <p>Whilst outside the Board's IDD, the watercourse adjacent to the proposed site is known to have capacity issues. Any additional rate or volume introduced to this watercourse could increase flood risk. The Board strongly recommends that (at the detailed design stage in the planning process) a surface water discharge proposal in line with the drainage hierarchy is submitted. Our recommendation is to ensure that surface water run-off will be well managed to ensure this is not further increased, as per paragraph 167 of the National Planning Policy Framework</p> <p><b>Anglian Water</b> Water Recycling Centre - Hockering-By. Capacity for future growth at least up to 155 dwellings.</p>	
<b>Other statutory consultees, agencies and organisations</b>	
<p><b>Sport England:</b> The site is situated next to a current playing field that is utilised by Hockering Football club. Although the site itself would not be positioned on the playing field, any development on the site should not negatively impact the use of the playing field in any way. Failure to comply with this may result in objection from Sport England to the allocation of this site.</p> <p><b>Natural England</b> (Nutrient Neutrality): HRA Required to show no adverse impact on designated sites. Natural England advise a plan-level nutrient budget is provided.</p> <p><b>Natural England</b> (Air Quality Screening): No comments</p> <p><b>Historic England</b> No site specific comment. <b>Landowner/Site promoter comment:</b>	
<b>Savills on behalf of The Lexham Estate</b> To sites put forward Site 1: land north of Lexham Road and west of Pound Lane, Litcham; and Site 2: Land east of Pound Lane, Litcham. Both sites were submitted for residential development, with Site 1 being capable of accommodating up to 250 dwellings, and Site 2 up to 150 dwellings. Should the Council have any considerations about phasing or splitting these sites, we would be open to these conversations. Both sites are located in the village of Litcham, which is currently classified as a Local Service Centre within the adopted Local Plan. It is understood that this classification proposes to be remained unchanged, given there have been minimal changes within the village with regards to services and facilities.

## 095 - Land Next to Ivy Barn, Mattishall

## Alternative

Address: Next to Ivy Barn, Welgate, Mattishall, NR20 3PL

Greenfield

Site area: 1.79ha

Estimated capacity: 42 dwellings

### Broad accessibility assessment

Settlement Hierarchy: Local Service Centre

• Dentist	Beech House Dental Surgery: 5629 metres (R >)
• Doctor	Mattishall Surgery: 910 metres (G <)
• Leisure Centre	Dereham Leisure Centre: 5133 metres (R >)
• Library	Dereham Library: 5596 metres (R >)
• Primary School	Mattishall Primary School: 711 metres (G <)
• Secondary School	Dereham Neatherd High School: 4745 metres (R >)

Overall ranking accessibility  
Amber: One to three core facilities within threshold distance

800m/10 minutes walking distance of the site in town centres; 1,200m elsewhere and 2,000m for school access and employment.

- **Green** 4+ core services within above threshold
- **Amber** 1 to 3 core services
- **Red** 0 core services

Walking and cycling  
Opportunities for walking and cycling access / enhancement based on accessibility to facilities and Local Service Centre location.

Open Space  
Category - General: 380 metres

<b>Landowner/Site promoter comment:</b>	
<p><b>None</b> LPR/CS4/DEV/095 For our site I noticed you have put Red against the following: Highways access - but there is an existing access from Welgate that farm machinery size vehicles can get down and we also own 20 Rayners Way which can easily be demolished to make a second access to the site if needed. There is also a ransom strip further along Rayners Way that is owned by the developers of the Rayners Way site in i think the 1980's, as well as an area that is currently a small car park on Ivy Way. Pedestrian access - but there is an existing Public Footpath running from Welgate along the access drive and through the field to the adjacent fields. A further pedestrian access can easily be gained through 20 Rayners Way to connect to the existing. Trees and Hedgerows - but the only trees that might require removing are some self sown ones near the pond that are approximately 10 years old. Unless access is required through 20 Rayners Way when a few more self sown trees that are a bit older would need to be removed (there is no hedgerow to the rear of 20 Rayners Way). All of these can easily be replaced with new within any given development.</p> <p>In terms of deliverability we have a couple of medium size construction companies that have expressed interest in purchasing the site but have been holding off until the outcome of this consultation. We would also like to emphasise we have no preconceived plans of development on the site, if it is felt a care home, doctors surgery, commercial premises etc for example was needed more than residential within the village that would be ok with us.</p>

<b>Anglian Water</b> Water Recycling Centre - Mattishall. Capacity for growth up to approximately 250 dwellings.	
<b>Other statutory consultees, agencies and organisations</b>	
<b>Sport England:</b> The southern border of this location connects to Mattishall Playing Field, which includes playing fields, the Sports and Social Club, Bowling Green, and parking facilities. Whilst the site would not be located on a playing field, development of the site should not prejudice the use of, all or any part of a playing field otherwise Sport England may object to it.	
<b>Natural England</b> (Nutrient Neutrality): HRA Required to show no adverse impact on designated sites. Natural England advise a plan-level nutrient budget is provided.

<b>Water Management Alliance advice</b> Minor development within the Board's IDD. The nearest Board maintained watercourse (MN 39 – Elmham, DRN099G0102) lies north, outside the development boundary. Whilst unlikely, should any alterations/discharges to the watercourse be proposed during the detailed stage of the planning process, consent from the Board would be required. In addition, consent would be required for works within 9 metres of this watercourse. Consent would also be required for any proposed discharges/alterations to any riparian watercourses within the IDD.	
<b>Anglian Water</b> Water Recycling Centre - North Elmham. Very limited head room for growth.	
<b>Other statutory consultees, agencies and organisations</b>	
<b>Sport England:</b> No comments

<b>Landowner/Site promoter comment:</b>	
<b>Brown and Co</b> I wish to make comment on behalf of my client in respect of the Site Assessments Phase 1 Profiles in relation to land north of Billingford Road, North Elmham (site reference LPRC4SDEV120). In response to the Phase 1 Assessment, the following points are noted:  The existing footway on Billingford Road (as extended in connection with the adjacent house) effectively extends up to the proposed site. No significant improvements are required to pedestrian facilities therefore.

<b>Norfolk Local Lead Flood Authority advice</b> Not reviewed	
<b>Water Management Alliance advice</b> Major development within the Board's IDD. The nearest Board maintained watercourse (MN 35 - Binley/Beetley, DRN101G0101) lies south, outside the development boundary for site LPR/C4S/DEV/283. Whilst unlikely due to the site's location, consent would be required for works within 9 metres of this watercourse. In addition, consent from the Board would be required for any proposed discharges/alterations to this watercourse/any ordinary watercourses within the IDD. Known flood risk concerns. The Board has concerns with the downstream network's capacity of site LPR/C4S/DEV/283. Therefore, surface water runoff will need to be well managed to ensure this is not further increased, as per paragraph 167 of the National Planning Policy Framework. The Board strongly recommend that at the detailed design stage, where practicable, SuDS are utilised on the development, in line with the Non-Statutory technical standards for sustainable drainage systems.

<b>Landowner/Site promoter comment:</b>	
<b>Scott Properties Ltd</b> Land to the East of Station Road and North of Wilby Road, Eccles Road (Quidenham) Land west of Station Road is being promoted for residential-led development of up to 130 dwellings alongside recreation and community uses. LEGAL The Site extends to c. 5.4ha (13.4 acres) and is in single ownership and subject to a long-term Promotion Agreement with Scott Properties. There are no legal or ownership issues which would prevent the Site coming forward for development. The Site abuts the adopted Highways on Station Road and Heath Road. - (Further detailed site commentary provided)

<b>Historic England</b> No site specific comment. HIA to inform Plan required, prepared in accordance with Historic England guidance.	
<p><b>Rocklands Parish Council</b> • Firstly, we believe that this site location has been mis-named. Chapel Street finishes opposite 'Corner Cottage' – where Bell Road starts. Reference to the Electoral Register will confirm • Under current policy, the proposed site is neither connected to nor adjacent to the Settlement Boundary. See 3PL/2023/0702/F for the Case Officer's reasons for refusal, "The site fall outsides the defined settlement of Rocklands classified as a Village with a Boundary and is not immediately adjacent to the settlement boundary."</p> <p>Under the proposed criteria: • The site is entirely Greenfield in nature. • Access to the site would be via either Bell Road or Chapel Street. Bell Road is an extremely narrow tertiary road with no passing places. It is probably the narrowest road in the parish, has high banks in places, blind bends and is used by large agricultural vehicles. Vehicle-vehicle and vehicle pedestrian conflicts are a regular occurrence on this narrow road. Chapel Street is another narrow tertiary road with few passing places, having three blind bends and the same agricultural traffic as Bell Road. We do not consider that access for additional properties will be either safe or practical. • Pedestrian access to the proposed site would be hazardous – extremely so from the Bell Road direction – there being no pavements in either Bell Road or Chapel Street. Conflict with large agricultural vehicles would pose a particular risk. • There would be unavoidable Visual Landscape Impact – particularly with respect to neighbouring and nearby properties on both sides of the road. These properties would lose the current visual amenity of unrestricted views of the surrounding rural landscape. See 3PL/2023/0702/F for the Case Officer's reasons for refusal, "The proposed development represent visual intrusion and erosion of the open countryside. The proposed design and appearance in terms of scale, height and massing of the dwelling, is out of character with the local context and street scene. It would result in unacceptable urbanisation of the area that would harm the character and appearance of the area including the open countryside. The proposed development is contrary to Policies COM01, GEN05, ENV05 &amp; GEN02 of the Breckland Local Plan (adopted 2019), as well as having due regard to National Planning Policy Framework (2023)." The above related to a single property on this site – a number of properties could only have greater negative</p>	

impact. Further, the North East corner of the proposed site would abut the Methodist Church graveyard – which is in regular use by the bereaved and their families. Adjacent dwellings would serve to disturb the peace and quiet, and the open countryside views valued by the users. • The proposed site is neither connected to, nor adjacent to, either the Built-up Area or the Settlement Boundary. • As stated in the Case Officer’s comments above, the proposed site would be unlikely to be in keeping with the scale and size of the settlement at this point. • Although this site can be perceived to align with the proposed development scenarios E and F in the consultation, we believe that the other factors above weigh significantly against development. • In summary, we contend that this site should not be accepted for development.

**Landowner/Site promoter comment:**

<b>Saham Toney</b> We have strong reservations with the process, we feel that the findings of the Saham Toney Neighbourhood Plan (STNP) should be adhered to as Six of the sites put forward were rejected by a comprehensive and detailed site assessment and selection process used when preparing STNP and should not now be reconsidered. Additionally two of the sites put forward are allocated in STNP, but for far fewer dwellings. Your process does not consider site access onto poor quality road/lanes, flooding and whether only part of a site is suitable for development. Both of those sites are part Brownfield and part arable, in the STNP they were both found suitable only as smaller developments. Site LPR/C4S/DEV/07 proposes 35 houses on 1.86 ha, it was initially rejected during the STNP 'Call for Sites' process, resubmitted, and accepted as a smaller development of 8 houses on 0.54 ha. The Site LPR/C4S/DEV/306 for 100 houses on 4.18 ha is once again partially brownfield the larger area being greenfield arable, the STNP agreed to just 10 houses on 1.06 ha on this site. Both sites access onto a country lane without footpath which has a single file bridge with weight restrictions, both smaller developments are mainly Brownfield. Likewise, three of the sites put forward have been previously rejected when submitted under planning applications. The Council's process has taken no account of STNP policies, but these form part of the Breckland Development Plan and must be adhered to.

<b>Saham Toney</b> We have strong reservations with the process, we feel that the findings of the Saham Toney Neighbourhood Plan (STNP) should be adhered to as Six of the sites put forward were rejected by a comprehensive and detailed site assessment and selection process used when preparing STNP and should not now be reconsidered. Additionally two of the sites put forward are allocated in STNP, but for far fewer dwellings. Your process does not consider site access onto poor quality road/lanes, flooding and whether only part of a site is suitable for development. Both of those sites are part Brownfield and part arable, in the STNP they were both found suitable only as smaller developments. Site LPR/C4S/DEV/07 proposes 35 houses on 1.86 ha, it was initially rejected during the STNP 'Call for Sites' process, resubmitted, and accepted as a smaller development of 8 houses on 0.54 ha. The Site LPR/C4S/DEV/306 for 100 houses on 4.18 ha is once again partially brownfield the larger area being greenfield arable, the STNP agreed to just 10 houses on 1.06 ha on this site. Both sites access onto a country lane without footpath which has a single file bridge with weight restrictions, both smaller developments are mainly Brownfield. Likewise, three of the sites put forward have been previously rejected when submitted under planning applications. The Council's process has taken no account of STNP policies, but these form part of the Breckland Development Plan and must be adhered to.

<b>Saham Toney</b> We have strong reservations with the process, we feel that the findings of the Saham Toney Neighbourhood Plan (STNP) should be adhered to as Six of the sites put forward were rejected by a comprehensive and detailed site assessment and selection process used when preparing STNP and should not now be reconsidered. Additionally two of the sites put forward are allocated in STNP, but for far fewer dwellings. Your process does not consider site access onto poor quality road/lanes, flooding and whether only part of a site is suitable for development. Both of those sites are part Brownfield and part arable, in the STNP they were both found suitable only as smaller developments. Site LPR/C4S/DEV/07 proposes 35 houses on 1.86 ha, it was initially rejected during the STNP 'Call for Sites' process, resubmitted, and accepted as a smaller development of 8 houses on 0.54 ha. The Site LPR/C4S/DEV/306 for 100 houses on 4.18 ha is once again partially brownfield the larger area being greenfield arable, the STNP agreed to just 10 houses on 1.06 ha on this site. Both sites access onto a country lane without footpath which has a single file bridge with weight restrictions, both smaller developments are mainly Brownfield. Likewise, three of the sites put forward have been previously rejected when submitted under planning applications. The Council's process has taken no account of STNP policies, but these form part of the Breckland Development Plan and must be adhered to.

<b>Water Management Alliance advice</b> Site A of the proposed sites at the former nurseries' location is within NRIDB's IDD. Consent would be required from the Board for any alterations or discharge to any riparian watercourse (excluding Main Rivers) within the Board's IDD. Whilst outside the Board's IDD, if at the detailed design stage Site B intended to discharge into a watercourse within the IDD, consent would be required.	
Best practice for the disposal of surface water should be followed, as per the SuDS hierarchy and Non-Statutory technical standards for sustainable drainage systems.

<b>Landowner/Site promoter comment:</b>	
<b>Bidwells on behalf of Abel Homes</b> Abel Homes are promoting land south of Dereham Road, Scarning, for residential or care related development (LPR/CS4/DEV/165). The Site Profile Assessment undertaken by the Council in relation to the site concludes that:  The site is within Scarning a Other settlement / village and is Greenfield Adjacent to the existing built-up area.  May align with scenarios A and C in the Development Scenarios consultation align with the site. Accordingly, the site will be considered by the Council as part of their Phase 2 Assessment; a position supported by Abel Homes. However, in undertaking the high-level assessment of the site, it is evident that certain incorrect assumptions have been made by the Council. To ensure that the Phase 2 Assessment is robust and based on correct information these matters are addressed below

<b>Landowner/Site promoter comment:</b>	
<p><b>Oxygen Conservation</b> 1. LPR/C4S/DEV/141: Land West of Rocklands Road</p> <p>2. LPR/C4S/DEV/142: Land East of Rocklands Road We have previously confirmed that these sites remain available and we consider that they are suitable, in principle, for residential development. This is on the basis that they are contiguous with the existing settlement boundary and have no significant policy or delivery constraints.</p> <p>We support the principle of residential development on the assumption that, as a sustainable village with existing facilities, Shropham may be required to accommodate a proportionate amount of growth in order to contribute to the District's housing target over the next plan period. We recognise that, cumulatively, the capacity of all three parcels is likely to exceed the growth target for that plan period. We assume that the previous landowner promoted them on the basis of providing alternative 'options' for the allocation of housing. Should the District Council pursue a development scenario that would require additional, proportionate, growth at Shropham, we would be pleased to work proactively with the District and Parish Councils, as well as other local stakeholders to help establish a preferred site for allocation. We consider that a sensitively designed development, at an appropriate scale, could be delivered alongside a comprehensive green infrastructure strategy that would not only complement our wider estate activities, but which could have wider amenity benefit for local residents.</p>

<b>Anglian Water</b> Water Recycling Centre - Swaffham. Likely to be sufficient capacity for at least 600 dwellings.	
<b>Other statutory consultees, agencies and organisations</b>	
<b>Sport England:</b> To the site's west, there are allotments and a playing pitch. Although the site itself would not be situated on a playing field, any development should not hinder the use of any portion of the playing field. Failure to comply with this may result in objection from Sport England to the allocation of this site.

<b>Landowner/Site promoter comment:</b>	
<p><b>landowners of Land South of Norwich Road and West of Dulgate Lane in Swaffham</b> Our client's sites lie to the south of the Norwich Road, and therefore have excellent access to the Excel bus service stops. The sites individually could deliver 50-200 new homes in a sustainable location within walking and cycling distance of Swaffham town centre. We have also promoted land for employment development in close proximity to the residential site, which could offer employment opportunities to new and existing residents, potentially increasing the sustainability of a residential allocation in this location. Please note that whilst the Land South of Norwich Road was split into two submissions in the call for sites process (ref LPR/CS4/DEV/136 &amp; LPR/CS4/DEV/315) and an proportion promoted for employment we consider that both of these sites could be suitable for residential use.</p>

<b>Landowner/Site promoter comment:</b>	
<b>Lanpro on behalf of Glavenhill</b> Proposes new RAG assessment for housing site off Woodgate Road, Swanton Morley - proposed development mixed residential and over 55s accommodation. Most phase 1 criteria proposed as green with exception of "built up area", and "settlement boundaries" proposed as amber, and as red for the sites greenfield status.

**Natural England** (Nutrient Neutrality): No comments

**Natural England** (Air Quality Screening): No comments

**Historic England** The Abbey Estate (Thetford): The Abbey Estate in Thetford lies to the north of the scheduled area of Saxon Town and to the east of the scheduled Cluniac Priory as well as a number of grade I listed buildings (Priory remains, Abbey Farm Cottage, Farm Building and Priory Gatehouse). Thetford Conservation Area extends into the eastern part of the estate. Any redevelopment of the Abbey Estate will need to give careful consideration to any impacts upon the conservation area, scheduled monuments and listed buildings and their settings. An HIA is required.

**Landowner/Site promoter comment:**

**Bidwells on behalf of Flagship Group** In respect of The Abbey (Ref: LPR/CS4/DEV/282) the Site is rated Green against all criteria, with the exception of three: trees and hedgerows (red), Brecks SPA buffer zone (amber) and (available).

In terms of the Site's impact on trees and hedgerows, whilst it is appreciated that some tree loss will be

unavoidable as part of any development, this will be relatively minor, and no protected trees will be lost.

Any scheme would also ensure that loss to hedges and trees are minimal, with any loss being offset

through a detailed landscaping strategy. Accordingly, it is considered that the Site should be rated as

Amber, which recognises that whilst there will potentially be an impact, it can be mitigated.

In terms of the rating against the Brecks SPA buffer zone, whilst it is acknowledged that the Site is within

the Buffer Zone any application can demonstrate that it will not have an adverse impact on the SPA.

The Site also rates Amber in relation to availability. Whilst a planning application has not yet been formally

submitted, proposals for regeneration are at an advanced stage, and have been subject to extensive consultation. Based on their current programme, Flagship Group are seeking to submit an outline planning application in Spring 2024. A Reserved Matters application for the first phase of development will be worked up in parallel with the determination of the outline application, which will potentially enable new homes to be delivered / occupied by 2028. Based on the initial phasing plan, the development will be delivered during the plan period. Accordingly, the Site should be rated Green in relation to both to both Available and Achievable.

<b>Historic England</b> No site specific comment. HIA to inform Plan required, prepared in accordance with Historic England guidance.	
<b>Thompson Parish Council</b> One site (reference LPR/CS4/DEV/140) which it is stated could accommodate 60 dwellings is assessed as “the site would be in keeping with scale of settlement” and would be “an extension to a lower tier settlement or part of a new lower tier settlement”. As the houses within the settlement boundary at present number around 120 this represents a 50% increase – one wonders what percentage increase would be considered unacceptable. Together, the 4 sites being taken forward for further review (LPR/CS4/DEV/140, LPR/CS4/DEV/108, LPR/CS4/DEV/170 and LPR/CS4/DEV/171) would potentially contribute 100 houses, an increase of 83%. Two of the sites brought forward are away from the built area of the parish and do not involve the building of dwellings, the proposed activity on the sites being equestrian in nature. The four sites brought forward which do relate to development which is residential in nature (LPR/CS4/DEV/140, LPR/CS4/DEV/108, LPR/CS4/DEV/170 and LPR/CS4/DEV/171) would, if all are accepted at the next stage of the review process, potentially result in 100 new dwellings the majority of which would be in a high density arrangement. The initial evaluation of these sites appears to have been carried out as a desk exercise with no reference to the characteristics and sustainability of the low-density settlement which they would adjoin.

Together, the 4 sites being taken forward for further review (LPR/CS4/DEV/140, LPR/CS4/DEV/108, LPR/CS4/DEV/170 and LPR/CS4/DEV/171) would potentially contribute 100 houses, an increase of 83%. Two of the sites brought forward are away from the built area of the parish and do not involve the building of dwellings, the proposed activity on the sites being equestrian in nature. The four sites brought forward which do relate to development which is residential in nature (LPR/CS4/DEV/140, LPR/CS4/DEV/108, LPR/CS4/DEV/170 and LPR/CS4/DEV/171) would, if all are accepted at the next stage of the review process, potentially result in 100 new dwellings the majority of which would be in a high density arrangement. The initial evaluation of these sites appears to have been carried out as a desk exercise with no reference to the characteristics and sustainability of the low-density settlement which they would adjoin.

**Landowner/Site promoter comment:**

<b>Landowner/Site promoter comment:</b>	
<b>Armstrong Rigg on behalf of Orbit Homes</b> LPR/CS4/DEV/379- consider criteria for assessing sites suitable and various comments made. Including noting the site should be considered as adjacent to and connected with existing settlement boundary, not separate from the boundary as assessed in Phase 1.

Scheduled Monument	Moated site W of Reymerston: 4863 metres	
<b>Natural Environment</b> (nearest designated geo / biodiversity sites and features. Local Plan HRA will assess subsequent Local Plan policy and proposals)		
Nutrient Neutrality Catchment Area	Yes The Broads SAC	
Ancient Woodland	Yaxham Wood: 1206 metres	
Geodiversity site	Newton-by-Castle Acre Chalk Pit: 17727 metres	
National Nature Reserve	Foxley Wood: 11799 metres	
County Wildlife Site	Manor Farm Marsh: 411 metres	
Local Nature Reserve	Toll's Meadow, Wymondham: 13508 metres	
Ramsar	Broadland: 25263 metres	
Special Protection Area (SPA)	Breckland 15742 metres. (Site Beyond 1.5km, HRA unlikely to be required. ) Within Stone Curlew buffer: No	
SSSI	Badley Moor 750 metres	
Special Area of Conservation (SAC)	Norfolk Valley Fens: 750 metres	
Agricultural Land	Grade 3	

**Water management and flood risk** (Further information, including surface water flood risk and cumulative impacts to be reported through Strategic Flood Risk Assessment, 2024)

Flood Zone 3	Proportion of site area 0.00%
Flood Zone 2	Proportion of site area 0.00%

**Norfolk Local Lead Flood Authority advice** Not reviewed  
**Water Management Alliance advice** No comments  
**Anglian Water** Water Recycling Centre - Mattishall. Capacity for growth up to approximately 250 dwellings.

**Other statutory consultees, agencies and organisations**

**Sport England:** No comments  
**Natural England** (Nutrient Neutrality): HRA Required to show no adverse impact on designated sites. Natural England advise a plan-level nutrient budget is provided.  
**Natural England** (Air Quality Screening): No comments  
**Historic England** No site specific comment. HIA to inform Plan required, prepared in accordance with Historic England guidance.  
**Yaxham PC** Norwich Road - land separating Yaxham and Clint Green, outside boundary, excessive density, greenfield site and lack of sewerage provision. Difference between Breckland Parish RAG rating and Yaxham PC rating - can this differences be considered. Provided information demonstrating discrepancies between RAG assessment Council provided and RAG assessment Yaxham PC has completed.

**Landowner/Site promoter comment:**

**Lanpro on behalf of Glavenhill** Glavenhill supports the allocation of site reference LPR/CS4/DEV/094 off Norwich Road, Yaxham for 90 new dwellings (in line with the Illustrative Concept Masterplan drawing reference 4555\_0001(A) previously submitted by Badger Homes in response to the earlier Local Plan call-for-sites process) in the emerging Local Plan. Glavenhill understands that Badger Homes will soon complete delivery of the permitted housing scheme off Roundhouse Way and as such exhaust housing supply/delivery within the village. It is therefore clear that additional housing land should be allocated in line with the Illustrative Concept Masterplan to meet market demand and local affordable housing needs. Glavenhill is also very concerned that site reference LPR/CS4/DEV/094 promoted by Badger Homes has not been properly assessed in Site Assessment Phase 1 Site Profile assessment (prepared in December 2023) for the following reasons:

• There would be no adverse visual and/or landscape impacts on the surrounding landscape as a

result of this site's allocation in the new Local Plan as the site is screened on all sides by existing

mature hedgerows and existing/committed built development along both Norwich Road and

Roundhouse Way. The lack of overall existing landscape quality and sensitivity in the area

surrounding the promoted site that is confirmed in the Appeal decision relating to the current

Roundhouse Way scheme is also not properly considered in the RAG scoring undertaken to-date.

As such it is not clear why this site was scored 'amber' as opposed to 'green' in the Site Assessment

Phase 1 Site Profile undertaken in December 2023;

• Furthermore as the promoted site is surrounded on three sides by existing built development within

the village of Yaxham it is further not clear why the site was this site was RAG scored "amber" as

opposed to 'green' in the "Built up area" scoring in the same Site Assessment Phase 1 Site Profile

prepared in December 2023;

• It is a planning fact that the promoted site is bounded on three sides by the existing defined

settlement boundary for the village of Yaxham. As such again it is not clear why the site was scored "amber" as opposed to 'green' in the "Settlement boundaries" scoring in the Site Assessment Phase

1 Site Profile prepared in December 2023; and

• Badger Homes is clearly well advanced in the construction of their consented dwellings off

Roundhouse Way and as they are already on-site it is further clear that the site is certainly

deliverable in the next 5-years. As an arable field with existing service connections from the

previous scheme the site is also free from any development constraints. As such it is not clear why

the site was scored "amber" as opposed to 'green' in the "Available (timeframe)" scoring in the Site

Assessment Phase 1 Site Profile prepared in December 2023.

This RAG assessment has also not had regard to the planned delivery of some 5.52 ha of new publicly

accessible open space under the scheme being promoted by Badger Homes. The Council will be aware that

such an approach would (1) offset nutrient neutrality to deliver a first phase of immediate housing delivery

to maintain employment levels within the site; and (2) further accords with the Government's community

health, well-being and biodiversity improvement objectives outlined in paragraphs 102 and 180 of the

National Planning Policy Framework.

As such, and for all the above reasons Glavenhill supports the Badger Homes proposal for the Norwich

Road site and contends it should be included as a housing site in the future preferred options version of the

emerging Local Plan.
