	Floorspace Projections	8

## 1.0 Introduction

- 1.1 Lichfields (formerly trading Nathaniel Lichfield and Partners) was commissioned by Breckland District Council to prepare a district wide town centre and retail study in 2010. The 2010 study was fully updated in a report dated December 2014.
- 1.2 In order to assess recent changes, Lichfields has been commissioned to undertake a partial update based on the latest population and expenditure projections. This report should be read alongside the Breckland Retail Study Update 2014 (BRSU 2014).
- 1.3 This partial update re-assesses the quantitative scope for new retail and food and beverage floorspace in Breckland District up to 2036. It sets out the methodology adopted for this analysis and provides a quantitative capacity analysis in terms of levels of spending for convenience and comparison shopping.
- 1.4 All monetary values expressed in this analysis are at 2015 prices unless stated otherwise, consistent with Experian's latest local expenditure estimates. The BRSU 2014 was based on 2012 prices, and therefore the expenditure and turnover figures within the two reports are not directly comparable.

## 2.0 **Methodology and Base Data**

2.1 The quantitative analysis is based on a study area defined for the five main shopping centres within the District i.e. Thetford, Dereham, Swaffham, Watton and Attleborough, as defined in the BRSU 2014, see Appendix 1.

### **Consumer Expenditure**

2.2 The level of available expenditure to support retailers is based on first establishing per capita levels of spending for the study area population. Experian's latest local consumer expenditure estimates for comparison and convenience goods for the study area for the year 2015 have been obtained.

2.3 Expenditure projections per person for convenience, comparison goods and food and beverage are shown in Table 2 in Appendix 2, 3 and 4, respectively.

### **Population**

2.4 The BRSU 2014 was based on Office of National Statistics (ONS) 2012-based projections for Breckland District. The latest ONS projections are the 2014-based data. These revised projections have been adopted in this report.

2.5 The previous study assumed the majority (95%) of the population growth in the District would be focused in Thetford and Attleborough, of which 60% would be located in the Thetford and 40% in the Attleborough area. The remaining 5% growth was spread throughout the other zones on a pro-rata basis. This update adopts a revised proportional distribution of population growth, as follows:

- Attleborough 25%;
- Thetford 25%;
- Dereham 10%;
- Swaffham 10%;
- Watton 10%; and
- All other areas 20%.

2.6 The BRSU 2014 indicated that the study area population would increase from 168,175 in 2011 to 197,244 in 2036, based on ONS 2012 projections. The updated projection based on the ONS 2014 projections is marginally higher at 198,073 in 2036.

### **Available Spending**

2.7 The levels of available spending are derived by combining the population in Table 1 with per capita spending figures Table 2 for convenience goods in Appendix 2; comparison goods in Appendix 3 and food and beverage in Appendix 4.

2.8 For both convenience and comparison spending, a reduction has been made for special forms of trading such as mail order, e-tail (non-retail businesses) and vending machines.

2.9 Special Forms of Trading (SFT) and non-store activity is included within Experian's expenditure estimates, which includes other forms of retail expenditure not spent in shops e.g. mail order sales, some internet sales, vending machines, party plan selling, market stalls and door to door selling. Experian provide projections for E-tailing and other SFT. These projections have been

used to exclude expenditure attributed to e-tailing through non-retail businesses, which will not directly impact on the demand for retail floorspace.

- 2.10 Based on Experian's latest data SFT (including non-retail e-tailing but excluding e-tail through retail businesses) is 2.7% and 12.0% of total convenience and comparison goods expenditure respectively in 2015. The projections provided by Experian suggest that these percentages will increase to 5.1% and 16.4% by 2033.
- 2.11 As a consequence of growth in population and per capita spending, convenience goods spending within the study area is forecast to increase from £327.56 million in 2015 to £428.33 million in 2036, as shown in Table 3 in Appendix 2.
- 2.12 Comparison goods spending is forecast to increase from £476.22 million in 2015 to £950.64 million in 2036, as shown in Table 3 in Appendix 3.
- 2.13 Food and beverage spending is forecast to increase from £165.56 million in 2015 to £250.55 million in 2036, as shown in Table 3 in Appendix 4.

## 3.0 Capacity for Convenience Floorspace

- 3.1 The results of the household shopper questionnaire survey, undertaken by NEMS in July 2014 were used to estimate base year shopping patterns within the study area. The market shares/shopping patterns are shown at Table 4 in Appendix 2.
- 3.2 Table 5 in Appendix 2 indicates that the level of convenience goods expenditure attracted to shops/stores in the Breckland District in 2015 is estimated to be £272.21 million.
- 3.3 Oxford Retail Consultants' (ORC) StorePoint database provides estimates of net sales area within food stores across the country. Figures for the first quarter of 2017 have been adopted in this update. Estimates for comparison sales floorspace within large food stores has been deducted, for consistency with the use of goods based expenditure figures.
- 3.4 Company average turnover to sales floorspace densities are available for major food store operators and are compiled by Mintel. Company average sales densities (adjusted to exclude petrol and comparison sales and include VAT) have been applied to the sales area of the large food stores listed in Table 11 in Appendix 2, and a benchmark turnover for each store has been calculated. This benchmark turnover is not necessarily the actual turnover of the food store, but it does provide a useful benchmark for assessing existing shopping patterns and the adequacy of current floorspace in quantitative terms.
- 3.5 Average sales densities are not widely available for smaller convenience shops, particularly independent retailers. An average sales density of £5,000 per sq.m has been adopted for small convenience shops, consistent with the BRSU 2014. The total benchmark turnover of existing convenience sales floorspace within Breckland District is £285.63 million (excluding local shopping facilities outside the main town and district centres).
- 3.6 The assessment of shopping patterns suggests that convenience goods expenditure available to facilities (excluding local shops) in the District at 2015 is £265 million. These figures suggest that collectively convenience retail facilities in the District are trading 7.2% below national average levels.
- 3.7 The future level of available convenience goods expenditure at 2019, 2021, 2026, 2031 and 2036 is shown at Tables 8 to 11 in Appendix 2.
- 3.8 The total level of available convenience goods expenditure available for shops in Breckland between 2016 and 2033 is summarised in Table 14 (Appendix 2). The benchmark turnover of existing convenience floorspace and food store commitments have been subtracted from the estimates of available expenditure to provide surplus expenditure estimates.
- 3.9 The estimates of surplus/deficit expenditure are converted into net floorspace projections in Table 14 in Appendix 2. Surplus expenditure is converted into floorspace estimates based on an assumed average sales density figure of £11,394 per sq.m, the average turnover density of the main food supermarket operators (Aldi, Asda, Lidl, Morrison's, Sainsbury's, Tesco and Waitrose) because new floorspace is likely to be provided by these main operators rather than small independent convenience shops.
- 3.10 There is a projected expenditure deficit in Swaffham and therefore a negative floorspace requirement is indicated over the plan period, due to the recent implementation of Tesco and Waitrose stores in Swaffham. In the other main settlements, surplus convenience goods expenditure could support additional floorspace in line with population growth. The figures are summarised in Table 3.1.

Table 3.1: Summary of Convenience Goods Floorspace Projections (sq.m gross)

Location	By 2021	By 2026	By 2031	By 2036
Thetford	-1,456	-589	277	1,231
Dereham	514	1,240	1,971	2,786
Swaffham	-3,485	-3,135	-2,787	-2,407
Watton	117	306	495	701
Attleborough	-148	381	905	1,464
Other Breckland	10	71	133	202
<b>Total</b>	<b>-4,449</b>	<b>-1,725</b>	<b>994</b>	<b>3,976</b>

Source: Table 12 in Appendix 2.

- 3.11 Expenditure projections could support 696 sq.m net (994 sq.m gross) of convenience goods floorspace by 2031 in the District as a whole. The 2036 projection is 2,783 sq.m net (3,976 sq.m gross).
- 3.12 The BRSU 2014 suggested 3,198 sq.m net (4,568 sq.m gross) could be supported by 2036. The updated figures are marginally lower due to Experian's lower expenditure projections for convenience goods.

## 4.0 Capacity for Comparison Floorspace

4.1 Breckland District attracts £214.18 million of comparison goods expenditure in total in 2015 (Table 5 in Appendix 3). The future level of comparison goods expenditure available to shops in Breckland District has been projected to 2019, 2021, 2026, 2031 and 2036, as shown in Tables 6 to 11 in Appendix 3.

4.2 Future available expenditure is compared with the projected turnover of existing comparison goods retail facilities within the District in order to provide estimates of surplus expenditure, as shown in Table 13 in Appendix 3. The estimates of surplus/deficit expenditure are converted into net floorspace projections in Table 14.

4.3 Trends indicate that comparison retailers historically will achieve some growth in trading efficiency. This is a function of spending growing at faster rates than new floorspace provision and retailers' ability to absorb real increases in their costs by increasing their turnover to floorspace ratio. Table 13 therefore assumes that the existing turnover of comparison floorspace will increase its benchmark turnover in real terms. A growth rate of 2% per annum is adopted as recommended by Experian.

4.4 The figures are summarised in Table 4.1.

Table 4.1: Summary of Comparison Goods Floorspace Projections (sq.m gross)

Location	By 2021	By 2026	By 2031	By 2036
Thetford	-1,104	711	2,757	4,892
Dereham	362	2,342	4,600	6,960
Swaffham	103	398	728	1,073
Watton	152	581	1,062	1,563
Attleborough	-381	248	939	1,655
Other Breckland	-2	35	78	123
<b>Total</b>	<b>-870</b>	<b>4,315</b>	<b>10,164</b>	<b>16,266</b>

Source: Table 14 in Appendix 3.

4.5 Expenditure projections could support 7,623 sq.m net (10,164 sq.m gross) of comparison goods floorspace by 2031 in the District as a whole. The 2036 projection is 12,199 sq.m net (16,266 sq.m gross).

4.6 The BRSU 2014 suggested 11,504 sq.m net (15,339 sq.m gross) could be supported by 2036. The updated figures are only slightly higher.

## 5.0 Capacity for Food and Beverage Floorspace

5.1 Breckland District attracts £71.92 million of food and beverage expenditure in total in 2015 (Table 5 in Appendix 4). The future level of food and beverage expenditure available to outlets in Breckland District has been projected to 2019, 2021, 2026, 2031 and 2036, as shown in Tables 6 to 10 in Appendix 4.

5.2 Future available expenditure is compared with the projected turnover of existing food and beverage facilities within the District in order to provide estimates of surplus expenditure, as shown in Table 12 in Appendix 4. The estimates of surplus/deficit expenditure are converted into floorspace projections in Table 13. The figures are summarised in Table 5.1.

Table 5.1: Summary of Food and Beverage Floorspace Projections (sq.m gross)

Location	By 2021	By 2026	By 2031	By 2036
Thetford	155	404	666	925
Dereham	120	352	602	849
Swaffham	41	99	160	220
Watton	32	81	131	181
Attleborough	174	388	607	820
Other Breckland	90	226	367	506
<b>Total</b>	<b>612</b>	<b>1,551</b>	<b>2,533</b>	<b>3,502</b>

Source: Table 13 in Appendix 4.

5.3 Expenditure projections could support 2,533 sq.m gross of food and beverage floorspace by 2031 in the District as a whole, increasing to 3,502 sq.m gross in 2036.

5.4 The BRSU 2014 suggested 3,715 sq.m gross could be supported by 2036. The updated figures are only slightly lower.

## 6.0

## Conclusions

## 6.1

This report provides an update of the District wide needs assessment for retail and food and beverage floorspace in Breckland. The NPPF states that local planning authorities should assess the quantitative and qualitative needs for land or floorspace for retail development and main town centre uses over the plan period.

## 6.2

Long term floorspace capacity forecasts beyond 2026 are susceptible to change due to unforeseen circumstances. Long term projections beyond 2026 are not only subject to changes in terms of population growth, but also growth in expenditure per capita and growth in turnover efficiencies. Experian's recommended growth forecasts for expenditure and turnover are particularly uncertain and need to be carefully monitored. Small variations in Experian's recommended growth rates (i.e. published annually) can lead to large variations in floorspace capacity when projected over a long period, therefore long term projections must be treated with caution and kept under review.

### Floorspace Projections

## 6.3

The quantitative assessment of the potential capacity for new retail floorspace suggests that there is scope for new development within Breckland. The projections suggest new floorspace (over and above commitments) should be distributed as shown in Tables 6.1, 6.2 and 6.3.
