**Subject:** Graphical clarification  
**Attachments:** SHMA\_NettPopulationDelta.pdf

Dear Charlotte,

Yesterday, I had some difficulty expressing in words what appears so easy with numbers and graphs. By way of clarification, please would you forward the attached to the Inspector and Mr Moore. The negative trend was the point I was trying to highlight, no matter whether it is based on a 5-year or 10-year arithmetic mean.

Thank you.

Kind Regards,

Tim.
